Install WordPress in CPanel

Domain & Hosting · https://wiweka.dev/tutorial/domain-hosting/install-wordpress-in-cpanel/

Introduction

This documentation provides step-by-step instructions on how to install WordPress in the cPanel of GoDaddy Hosting. It covers essential details about GoDaddy, cPanel, and WordPress, ensuring a seamless installation process.

Requirements

Before proceeding with the installation, make sure you have the following:

- GoDaddy Hosting Account
- Access to cPanel
- Basic understanding of WordPress

Step 1: Access cPanel

To get started, you need to access your GoDaddy cPanel. Follow these steps:

1. Log in to your GoDaddy account.
2. In the "My Products" section, click on "Web Hosting".
3. Locate your domain and click on "Manage".
4. Scroll down to the "cPanel" section and click on "Manage".

Step 2: Install WordPress

Once you are in the cPanel, follow these steps to install WordPress:

1. In the "cPanel Home" section, scroll down and find the "Web Applications" category.

2. Look for the "WordPress" application and click on it.
3. Click on the "Install This Application" button.
4. Choose the domain where you want to install WordPress.
5. Fill in the necessary details like Admin Username, Admin Password, and Website Title.
6. Click on the "Install" button to start the installation process.
7. Wait for the installation to complete.

Step 3: Access Your WordPress Website

After the installation is complete, you can access your WordPress website using the following steps:

1. Go back to the cPanel home page.
2. Scroll down and find the "File Manager" category.
3. Click on "File Manager" to access your website files.
4. In the File Manager, navigate to the directory where WordPress is installed (usually the public_html directory).
5. Find the "wp-admin" folder and click on it.
6. Locate the "wp-login.php" file and right-click on it.
7. Select "View" to open the WordPress login page.
8. Enter your Admin Username and Password to log in.

Conclusion

Congratulations! You have successfully installed WordPress in the cPanel of GoDaddy Hosting. You can now start customizing your website, installing themes and plugins, and creating amazing content.
